Summary of Qualifications

Accomplished professional with over 20 years of experience in mechanical engineering and procurement, recently specialized in MERN stack software development through Generation Thailand's Bootcamp. Experienced in project management, procurement optimization, and cross-functional collaboration. Strong problem-solving abilities and a growth mindset. Proficient in using the MS Power Platform for automation and data analysis. Seeking a Tech-Project Management role to leverage my diverse background and drive innovative, customer-centric solutions.

Professional Experience

Junior Software Developer Bootcamp (Sep 2024 - Dec 2024)
Generation Thailand

- Built web applications from React as front-end, Node.js as back end and MongoDB as a database.
- Hands-on experience with full-stack real-world projects.
- Worked in an Agile team environment, utilizing Scrum methodologies for sprints, stand-ups, and collaborative teamwork.

Senior Purchasing Staff (Nov. 2019 - Jun 2024)
Bridgestone Tire Manufacturing (Thailand) Co., Ltd

- Sourced and identified potential suppliers and evaluated their products and services.
- Engaged in negotiations with suppliers to secure favorable terms and pricing.
- Managed a wide range of categories, including Mechanical, Electrical, and Construction Projects and Services. Handled standard and made-to-order machinery parts.
- Streamlined the procurement process using the MS Power Platform, including Power BI for data analysis and visualization, Power Automate for process automation, and Power Apps for custom applications.

Mechanical Engineer (Apr. 2003 - Oct 2019)
Bridgestone Tire Manufacturing (Thailand) Co., Ltd

- Led machinery installation projects. Collaborated with cross-functional teams. Developed detailed project plans, monitored progress, and addressed challenges. Fostered effective communication and problem-solving.
- Conducted thorough inspections to verify machinery specifications and safety.
- Managed projects within allocated budgets.
- Identified opportunities for process optimization and efficiency gains.
